PORTFOLIO danielisrael.dev

PROFESSIONAL SUMMARY

React and TypeScript engineer with production experience shipping web and mobile product features end to end. Strong in UI quality, performance-focused delivery, and cross-functional collaboration with clear ownership from implementation through release.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Nov 2025 – Feb 2026

InsightLabs

- Enhanced dashboard with standardized UI components, modal navigation, and comprehensive design language
- Built customer-facing automation pipeline with scheduled analyses, generating real-time charts and PDF reports
- Created shared type definitions in TypeScript and Python ensuring runtime type safety across frontend and backend

Mobile Developer

Jan 2025 – Oct 2025

Secrets AI

- Built AI companion app from scratch with React Native and Expo, featuring comprehensive chat interfaces with real-time messaging and image sharing
- Implemented pixel-perfect Figma designs with shared element transitions, interactive image carousels, and smooth animations throughout the app
- Built image caching system using hash-based lookups, eliminating redundant downloads and improving load performance
- Managed complex application state with Redux for unread messages, user preferences, and real-time chat status across screens

Mobile Front End Developer

Jul 2023 – Dec 2024

Goose Insurance Services

- Rebuilt marketing website with Astro JS, reducing load times from 8s to milliseconds and cutting infrastructure costs by 10x
- Set up headless CMS with StoryBlok enabling marketing team to independently create and manage blog content
- Rewrote React Native components for increased reusability and created Redux-controlled UI components (modals, popups) reusable across the team
- Built real-time testing dashboard subscribing to Firestore updates, enabling parallel test workflows and 5x QA speed improvement

Full Stack Developer

May 2020 – Sep 2023

PhoneMe Project UBC

- Built responsive web interface with Next.js and Tailwind for cross-device compatibility
- Implemented offline-capable poem creation in mobile app with media upload and 3D search functionality
- Migrated to Firebase serverless architecture, reducing costs from $200/month to $0 while handling spiky usage

EDUCATION

Bachelor of Computer Science — 2018 – 2022

University of British Columbia
Algorithms, ML, computer vision. Java, C/C++, Python, Haskell, TypeScript. 3rd place hackathon 2019.

Bachelor of Applied Human Sciences — 2009 – 2014

Concordia University – Montreal, QC
Dean's List. Research Assistant, Teaching Assistant. Presented at SSHRC conference.

TECHNICAL SKILLS

Frontend & Mobile
React, React Native, Next.js, Expo, Redux, Tailwind, Astro JS, Storyblok, Electron, browser 3D visualization

Backend, Cloud & APIs
Node.js, Flask, Firebase (Firestore, Auth, Cloud Functions), GCP (Cloud Run, Cloud Functions, Cloud Scheduler), REST APIs, SQL, Zendesk integrations

Languages
TypeScript, JavaScript, Python, Java, C/C++

Tools, AI & Delivery
Git, EAS, Cursor, GitHub Copilot, Claude, iOS/Android deployment, push notifications, in-app purchases, document/table editing UIs
